Amplify API Documentation

Bearer Token Auth Required: Bearer amp-token

Endpoint: /chat (POST)

 Offers real-time chat capabilities exclusively through streaming. Interact with a selection of the most advanced AI chat models available, including GPT, Claude, and Mistral.

Expected Data	Responses

model (string): Required.
  Options include:
    - gpt-35-turbo, gpt-4o
    - gpt-4-1106-Preview
    - anthropic.claude-3-haiku-20240307-v1:0
    - anthropic.claude-3-5-sonnet-20240620-v1:0
    - anthropic.claude-3-opus-20240229-v1:0
    - mistral.mistral-7b-instruct-v0:2
    - mistral.mixtral-8x7b-instruct-v0:1
    - mistral.mistral-large-2402-v1:0
temperature (number)
max_tokens (integer)
dataSources (array of strings)
messages (array of objects):
    - **role** (string): Required.
      Options include:
      - system
      - assistant
      - user.
    - **content** (string): Required.
type (string): Options include prompt.
options (object):
 - **dataSourceOptions** (object)
 - **ragOnly** (boolean)
 - **skipRag** (boolean)
 - **assistantId** (string)
 - **model** (object):
    - **id** (string)
 - **prompt** (string)
	200: Chat stream response.
	Content: application/json
	   success (boolean)
	   message (string)
	   data (string)
	400: Bad request, invalid or missing fields.
	401: Unauthorized, invalid authentication credentials.
	403: Forbidden, request refused.
	404: Not found, resource not found.

Example Body	Example Response

Endpoint: /state/share (GET)

View a list of shared resources, including assistants, conversations, and organizational folders, distributed by other Amplify platform users

Expected Data	Responses

N/A	**200:** List of shared data records.
	Content: application/json
	   sharedBy (string)
	   note (string)
	   sharedAt (string, date-time)
	   key (string)

Example Body	Example Response

N/A	[{
	    "note": "testing share wit a doc ",
	    "sharedAt": 1720714099836,
	    "key":
	"yourEmail@vanderbilt.edu/sharedByEmail@vanderbilt.edu/932804035837948202934805-24382.json",
	    "sharedBy": "sharedByEmail@vanderbilt.edu"
	  }],

Endpoint: /state/share/load (POST)

Once the shared data is accessed, individual elements can be retrieved and examined using a unique identifier key associated with each entry in the shared resource list.

Expected Data	Responses
key (string): Required.	**200:** Shared data loaded successfully. Content: application/json <**exportSchema**> **401:** User does not have access to the share functionality. **404:** Data not found.
Example Body	Example Response
| ```
{
   "data": {
      "key":

``` |

Endpoint: /assistant/files/upload (POST)

Initiate a file upload to the Amplify platform, enabling interaction via prompts and assistants. The endpoint generates and returns a time-limited, pre-authenticated URL, facilitating secure transmission of file contents.

Expected Data	Responses

name (string): Required.
  Options include:
  - saveAsData
  - createChunks
  - ingestRag
  - makeDownloadable
  - extractText
params (object)
type (string): Required.
name (string): Required.
knowledgeBase (string): Required.
tags (array of strings): Required.
data (object): Required.
	200: File upload process initiated or completed successfully.
	Content: application/json
	  success (boolean)
	  uploadUrl (string, nullable)
	  statusUrl (string, nullable)
	  contentUrl (string, nullable)
	  metadataUrl (string, nullable)
	  key (string, nullable)
	400: Bad request, incorrect or missing parameters.
	401: User does not have access to the file upload functionality.

Example Body	Example Response
| ```
{
   "data":{
     "type": "application/fileExtension",
     "name": "fileName.pdf",
     "knowledgeBase": "default",
     "tags": [],
     "data": {}
}}
``` | ```
{
   "success": true,
   "uploadUrl": "<uploadUrl>",
   "statusUrl": "<statusUrl>",
   "contentUrl": "<contentUrl>",
   "metadataUrl": "<metadataUrl>",
   "key":
"yourEmail@vanderbilt.edu/date/293088.json"
}
``` |

Endpoint: /assistant/files/query (POST)

View a list of uplaoded Amplify data sources.

Expected Data	Responses

startDate (string, date-time):
  Default is 2021-01-01T00:00:00Z.
pageSize (integer):
  Default is 10.
pageKey (object):
 - **id** (string)
 - **createdAt** (string)
 - **type** (string)
namePrefix (string or null)
 	
createdAtPrefix (string or null)
typePrefix (string or null)
types (array of strings):
  Default is an empty array.
tags (array of strings):
  Default is an empty array.
pageIndex (integer):
  Default is 0.
forwardScan (boolean):
  Default is false.
sortIndex (string):
  Default is createdAt.
	200: Returns a list of files that match the query criteria. Content: application/json
	  success (boolean)
	  data (object)
	  items (array of objects)
	  pageKey (object): Key to retrieve the next page of results

Example Body	Example Response

``
{
   "data":{
     "pageSize": 2,
     "sortIndex": "",
     "forwardScan": false
     }
}
``
	``
	{
	  "success": true,

	        "totalItems": 1025,
	        "type": "application/fileExtension"
	      }] } }
	``

Endpoint: /assistant/tags/list (POST)

View a list of your Amplify tags that can be tied to your data sources, conversations, and assistants.

Expected Data	Responses

N/A	**200:** A list of tags.
	Content: application/json
	    success (boolean)
	    data (object)
	    tags (array of strings)

Example Body	Example Response

{
   "data": {}
}
	{
	   "success": true,
	   "data": {
	     "tags": [
	       "NewTag"
	     ]}}

Endpoint: /assistant/tags/create (POST)

Create new Amplify tags that can be tied to your data sources, conversations, and assistants.

Expected Data	Responses

tags (array of strings): Default is an empty array.	200: Result of tag creation.
	Content: application/json
	    success (boolean)
	    message (string)

Example Body	Example Response

{
   "data": {
     "tags": ["NewTag"]
   }
}
	{
	   "success": true,
	   "message": "Tags added successfully"
	}

Endpoint: /assistant/tags/delete (POST)

Delete an Amplify tag.

Expected Data	Responses

tag (string): Required.	**200:** Result of tag deletion.
	Content: application/json
	    success (boolean)
	    message (string)

Example Body	Example Response

{
   "data":{
     "tag": "NewTag"
   }
}
	{
	   "success": true,
	   "message": "Tag deleted successfully"
	}

Endpoint: /assistant/files/set_tags (POST)

Associate an Amplify tag with a specific data source, conversation, or assistant.

Expected Data	Responses

id (string): Required.
tags (array of strings): Default is an empty array.
	200: Result of setting file tags.
	Content: application/json
	    success (boolean)
	    message (string)

Example Body	Example Response

{
   "data":{
     "id":
"yourEmail@vanderbilt.edu/date/290208.json",
     "tags": ["NewTag"]
   }
}
	{
	   "success": true,
	   "message": "Tags updated and added to user"
	}

Endpoint: /embedding-dual-retrieval (POST)

Retrieve Amplify data source embeddings based on user input through dual retrieval method.

Expected Data	Responses

userInput (string): Required.
dataSources (array of strings): Required.
  - id (string): global key
limit (integer)
	200: A list of documents related to the user input.
	Content: application/json
	    result (array)

Example Body	Example Response

<table>

	      "role": "assistant",
	      "textContent": "<Text Content>",
	      "content": []

]
  }
}
	}
	  }
	}

Endpoint: /assistant/files/download/codeinterpreter (POST)

Download Code Interpreter generated files via pre-authenticated URL

Expected Data	Responses

key (string): Required.
fileName (string): Not required, will automatically download if given the specific file name
	200: File download for Code Interpreter.
	Content: application/json
	  success (boolean)
	  downloadUrl(boolean)

Example Body	Example Response

{
   "data": {
     "key":
"yourEmail@vanderbilt.edu/ast/3498504729"
   }
}
	{
	  "success": true,
	  "downloadUrl": "<Download URL>"
	}

Endpoint: /assistant/openai/thread/delete (DELETE)

Delete a thread, deleting your existing conversation with code interpreter

Query Parameters	Responses

threadId	**200:**
	Content: application/json
	  success (boolean)
	  message (string)

Example URL Parameter	Example Response

?threadId=yourEmail@vanderbilt.edu/thr/8923420	{
	  "success": true,
	  "message": "Thread deleted successfully"
	}

Endpoint: /assistant/openai/delete (DELETE)

Delete a code inerpreter assistant instance

Query Parameters	Responses
assistantId	**200:**

	Content: application/json **success** (boolean) **message** (string)
Example URL Parameter	Example Response

?assistantId=yourEmail@vanderbilt.edu/ast/386233	{
	  "success": true,
	  "message": "Assistant deleted successfully"
	}
